TREATMENT PLANNING AND GUIDED SURGERY: A CHOICE THAT **MATTERS.**

The time has come to embrace the future of digital dentistry. How? Integrating coDiagnostiX® into your laboratory workflow. Provide top-notch treatment planning and production services for your professional network, increasing your efficiency, growing your business and improving the relationship with your clinicians.

“coDiagnostiX® has helped me to increase my business, because I’m able to produce and propose new services to the external market, such as surgical guides, temporary restorations in combination with a surgical guide, or even design services based on the DICOM data.”

Maurizio Mozzanica, Artitec dental laboratory, Italy

GUIDED SURGERY

Produce a great variety of surgical guides and empower your clinicians with predictable outcomes for their patients.

AESTHETIC OUTCOME

Design and produce customized elements to help your clinicians deliver high-quality aesthetic care.

IMMEDIATE PROTOCOLS

Optimally support your clinicians with immediate protocols by providing customized temporary restorations right at the time of surgery.

SEAMLESS COLLABORATION

Support your clinicians with a full range of services and let them focus on their patients.

HELP YOUR CLINICIANS MAKE THEIR PATIENTS SMILE.

EXPERIENCE THE DIFFERENCE.

Discover our powerful planning software designed to maximize the potential of your laboratory and help you optimally support your clinicians.

EXPANDED SERVICE OFFERING

Offer a wide choice of treatment planning, guide design and production services for a full range of indications.

INCREASED PRODUCTIVITY

Benefit from powerful features beyond implant planning and optimize your digital workflow.

SEAMLESS COLLABORATION

Take advantage of improved collaboration features and become your clinicians' partner of choice.

EXCELLENT CONNECTIVITY

Easily connect to your CAD software and 3D printer or import optical scans received from your clinicians thanks to open interfaces.

INTEGRATED LIBRARY

Support your clinicians with their full choice of implants, sleeves, abutments and scanbodies for fully guided surgery. An integrated library makes a broad range of elements from most major manufacturers instantly available.

PLANNING POWER AT YOUR FINGERTIPS.

coDiagnostiX® brings you seamless and effective service provision with integrated communication tools, a comprehensive element library and open interfaces. Don't miss the chance to discover all these groundbreaking features.

CLOUD-BASED COLLABORATION

Easily exchange data via caseXchange™ to seamlessly collaborate with your network of clinicians. Access Straumann services like Smile in a Box™ or Centralized Production to cushion production peaks, whenever needed.

EXPANDED SERVICE OFFERING

Offer guide production services for your dentists. Design and produce customized elements for immediate temporization or gingiva formers using our groundbreaking Synergy workflow.

INCREASED PRODUCTIVITY

Optimize the workflow for edentulous cases by defining a cut profile in coDiagnostiX®, facilitating bone reduction guides and stackable solutions.

ALL-IN-ONE SOLUTION

Benefit from a comprehensive solution that supports a full range of dental indications, such as implantation, endodontics, gingivectomy, sinus lift and many more. Add CAD power to your planning software with the coDiagnostiX® Mesh Editor, improving surgical guide design and tooth extraction workflows.

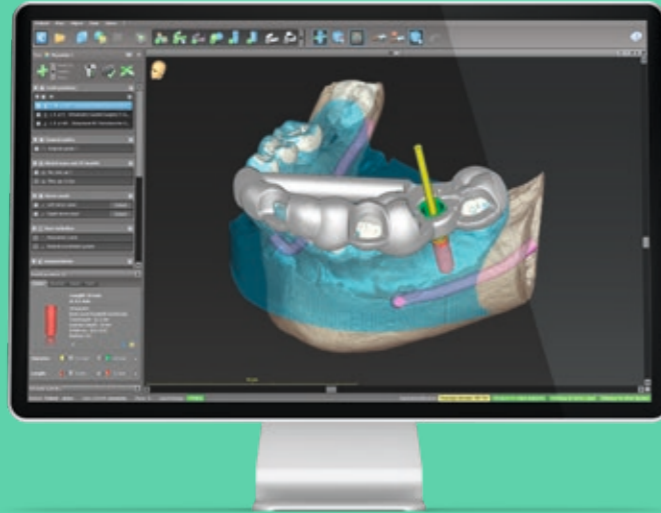

OPEN SYSTEM

Tailor your support to your clinicians' individual preferences with a comprehensive element library with implants, sleeves, abutments and scanbodies from most major manufacturers. Industry standard STL file export ensures compatibility with open CAD solutions and 3D printers.
